AMATEUR VOLLEYBALL TOURNAMENT

Description:

A sports center wants to build a simple system to organize and manage an amateur volleyball tournament. The goal is to model the basic elements of a tournament and handle operations related to teams, matches, and results.

Users:

- One Organizer
- Dozens Teams
- Hundreds Players
- Thousands Spectators
- Tens Referees
- Dozens Coaches

Requirements:

- The coaches can register the teams, with number and nominative of the players, and each team has its home stadium
- The tournament brackets, the teams participating and dates of the games are decided by the organizer
- The organizer must assign a referee for each match
- Spectators can view the dates of upcoming tournament's games
- Spectators can reserve a spot for the each match
- Spectators can view the tournament scoreboard and check the results
- Each team can enter in more than one tournament
- Each match is assigned a stadium

Additional context:

- Peaks of users are expected close to the dates of important matches
- The organizer sets the tournament structure based on how many teams are registered
